

# U-15

Utilising a robust 15kW high torque drive system the U-15 can handle a wide range of difficult shredding tasks. With knife sizes ranging from 6mm up to over 31mm available in numerous profile geometries, flexibility is the key to this model's success.

## Key Features

- Up to 75% volume reduction
- Economical product waste recycling
- Self-cleaning, counter rotational shafts for continuous shredding
- Flexible feed and discharge arrangements available
- Automatic reversing and overload protection system
- Basic and smart control system options
- Variety of knife and hook options to suit different products and shred size requirements
